					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Location; Township 28S Range 35E Section NW 1/4 18 ; Latitude N59 degrees 29.706, Longitude W139 degrees 33.401 (NAD27). Stream is number 16 on the map.

Stream characteristics: Width .3 - 1.2 m, depth .2 - .9 m. Substrate sand, clay and organics . Good rearing habitat - muskeg/wetlands with some tannic coloration. Temp 9 degrees C.

Stream surveys were part of the Yakutat Fish Habitat and ATV Trail Assessment project. Field crews surveyed streams for fish using baited minnow traps. Soak times for traps were usually less than 30 minutes per trap/ two traps per sample site. Captured fish were identified and released on-site. Field teams were comprised of ADF&G and Yakutat Ranger District personnel.

Hi Ed—I'll try to get you questions answered today before we head to Juneau. In this case, the streams drain as I've modified your photo...and 17 goes into Situk. Another case where high water and previous channels have changed. Phil

Subject: Situk question

Hi Phil,

Thanks again for coming by and helping me with the streams in the Yakutat area. Another question came up regarding streams numbered 15 thru 17 on your survey, tributaries to the Situk. As you can see on the attached photo the new USGS hydro that would correspond to your Stream 15 drains into two different systems. The lower end drains into the Situk as you indicated, however they show the upper end draining into the Lost River, 10100. Is this in fact the case or does the upper portion and stream 17 drain into the Situk as you originally submitted.
